

Assembly Instructions: 1094-3P

IMPORTANT:

- ALL INSTALLATION WORK SHOULD BE DONE BY ACCREDITED PROFESSIONAL.
- SHUT OFF POWER SUPPLY AT FUSE OR CIRCUIT BREAKER!
- USE ONLY THE SPECIFIED BULBS. DO NOT EXCEED THE MAXIMUM WATTAGE!

For Customer Service, contact the place of purchase to arrange for replacement parts.

PREPARING FOR INSTALLATION

Remove all of the contents from the carton. See the important notes above. Shut off the power at the circuit breaker and completely remove the old fixture from the wall, including the old mounting strap.

1. From the parts bag remove the mounting strap (A) assembly. One end of nipple (F) should be attached to mounting strap (A) with washer (C) and hex nut (D) in place. The other end should have canopy loop (H) attached. Attach mounting strap (A) to the junction box using mounting screws (B) and a screwdriver. Tighten securely. Unscrew canopy loop collar (I) from canopy loop (H). Pass canopy (G) over the mounted canopy loop to test the height. Approximately half of the canopy loop's exterior threads should be exposed, and the canopy loop collar should fit snugly onto the canopy loop. Remove canopy (G) and adjust the height of nipple (F) and canopy loop (H) until the desired height is reached. Pull house wires from the center of mounting strap (A).

ASSEMBLING THE FIXTURE

2. Feed the fixture wires from nipple (O) through top loop (N). Carefully push the wires through the hole in the top loop (N) until it comes out. Pull the wires until taut. Thread top loop (N) onto nipple (O) to secure the top loop piece to the fixture body. Pull the wires until taut. Carefully attach the glass (L) to the fixture by placing glass (L) over the top the cap (P) and sliding glass down the cap and over the fixture body until snug. Gravity now secures the glass (L) to the fixture via tension and pressure on cap (P). Measure to determine the correct length of chain needed for proper hanging height. If necessary, use a pair of pliers to open and remove any excess chain. Attach each of the chain connectors (M & J) to each end of chain (K) before attaching one end of the chain connector/chain to top loop (N). Connect the other chain connector (J) to the canopy loop (H). Close the chain connectors (M & J) to secure. Feed the fixture's wires up through the chain (K) (every three links or so), pulling the wires until taut. Gently slide canopy loop collar (I) and canopy (G) down onto the chain/wires. Trim excess wires leaving about 8 to 10 inches for later.

CONNECTING THE WIRES

3. Have an assistant support the fixture's weight while completing the wiring. Refer to the wiring diagram and attach the fixture's wires to the power supply wires from the junction box. Connect Hot to Hot (transparent wire with black inner thread, black, or smooth wire) Neutral to Neutral (transparent wire with white inner thread, white, or ribbed wire), and Ground to Ground (transparent wire with green inner thread, green wire, or copper). Twist the ends of the wire pairs together, and then twist on a wire connector. Make sure all twists are in the same direction. If there is no house ground wire coming from the junction box, locate ground screw (E) on the mounting bracket/mounting strap and wrap the fixture's ground wire around the ground screw. Use a screwdriver to tighten the top of ground screw (E) onto the wires and into the mounting bracket/mounting strap. Tuck the wires into the junction box.

How to Identify the Fixture's Wires

Hot	Neutral	Ground
Smooth	Ribbed	Bare Metal, Green, or
Black	White	Green Inner Thread
Black Inner Thread	White Inner Thread	

FINISHING THE INSTALLATION

4. Push canopy (G) up to the ceiling and slide canopy loop collar (I) up beneath the canopy. Tightly thread canopy loop collar (I) onto canopy loop (H) to secure canopy (G) in place until snug against the ceiling.

Install light bulbs (not included) into sockets (R) accordance with the fixture's specifications. Do not exceed the maximum.

Your installation is now complete. Turn on the power and test the fixture.

CLEANING TIPS

Treat the fixture gently! Regular cleaning will reduce the need for deep cleaning. For regular cleaning, turn off the light and wipe down the fixture with a clean lint-free cotton or microfiber cloth. Never spray cleaner directly onto the fixture.
